TREDENCE AI GRADS · PROJECT EVALUATION

Participant_03

Milestone 2 · Loan Default
Submission:
Submission-Milestone2/Participant_M2_03_loan_default_medium.ipynb
Evaluated: 27 Oct 2026

5 / 100
Below 50% · 5%

Criterion-wise marks

ML Model Development — 5 / 25

The submission shows awareness of appropriate ML models and pipeline components but lacks any executed or reproducible model development. Implementing and running the pipeline with train/test split is needed.

Hyperparameter Tuning & Validation — 0 / 20

No hyperparameter tuning or validation results are provided. Actual tuning runs with cross-validation and documented methodology are required.

Model Comparison & Performance Evaluation — 0 / 20

Without executed model evaluation and metric reporting, no assessment of model performance or comparison is possible.

Risk Factor / Feature Importance Analysis — 0 / 15

Feature importance analysis is missing. After model fitting, feature importance with interpretation and limitations should be included.

Clustering & Borrower Segmentation — 0 / 20

No clustering or borrower segmentation evidence is provided. Implementing clustering with justification and interpretation is needed.

Strengths

• Clear project and milestone identification.
• Awareness of appropriate ML models and validation strategies.
• Explicit caution about not claiming unexecuted results.

To improve next time

• Execute and document model training pipelines with reproducible splits.
• Perform and report hyperparameter tuning with cross-validation.
• Provide quantitative model comparison with relevant metrics.
• Include feature importance analysis with interpretation.
• Implement clustering and borrower segmentation with business insights.

Overall feedback

This submission provides a well-structured outline and demonstrates understanding of the required steps for Milestone 2 but lacks any executed code or results. To meet the milestone requirements, the participant must run the analyses, report metrics, and provide interpretations. Currently, the submission is incomplete and cannot be scored beyond minimal recognition of planning.

AI-generated evaluation against the milestone rubric. Subject to trainer review. Each submission is evaluated once; this score is recorded.
