Criterion-wise marks

Neural Network Design & Implementation — **0 / 25**

No neural network design or implementation is present. To improve, implement a suitable neural network architecture with justified design choices.

Data Preparation & Training — **0 / 20**

Data preparation and training steps are missing. Implement proper preprocessing, splitting, and training procedures to earn marks.

Model Evaluation & Overfitting Analysis — **0 / 20**

No evaluation or overfitting analysis is present. Include appropriate metrics and analysis to assess model performance and generalization.

ML vs DL Comparison — **0 / 15**

No ML vs DL comparison is provided. Perform a fair comparison using consistent data splits and metrics.

NLP Implementation & Findings — **0 / 20**

No NLP work is done. Implement an NLP task using supplied text data if available.

Strengths

• The notebook includes clear TODO comments indicating awareness of required steps for Milestone 3.
• Data loading code is present and checks for dataset availability.

To improve next time

• Implement the neural network architecture with justified design choices.
• Perform full data preprocessing, splitting, and training with reproducibility.
• Generate and report evaluation metrics and overfitting analysis.
• Conduct a fair comparison between ML and DL models on the same data.
• Implement the NLP task using supplied text data and report findings.

Overall feedback

This submission is a draft with no executed code or results for Milestone 3 requirements. It shows awareness of the tasks but lacks any implemented analysis, modeling, or evaluation. Significant

work is needed to meet the milestone expectations.

AI-generated evaluation against the milestone rubric. Subject to trainer review. Each submission is evaluated once; this score is recorded.
